September 3, 2015

Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

To whom it may concern:

The modular radio YLFSE2100WL when installed in the 7signal Sapphire Eye 2100 host has firmware limits preventing use of the 20MHz channel centered at 5720 MHz and preventing use of the 40MHz channel centered at 5710 MHz. No user controls can enable those two channels.

Sincerely,

Veli-Pekka Ketonen
